### 2. WOOL.

The selling season in Sydney closed on 18th June. Due to excellent clearances at auctions throughout the year, the carry-over was negligible. New season's sales commence on 31st August.

The course of wool prices is shown in Table 25. The average price realised for greasy wool sold at Sydney auctions in the year ended June, 1936, was 14·0d. per lb. as compared with 9·7d. per lb. in 1934-35, and 15·8d. per lb. in 1933-34.

## 3. WHEAT.

The area sown with wheat for 1935-36, according to returns of wheatgrowers in December, was 4,032,700 acres, including 3,776,190 acres for grain. Based on these returns, the crop for grain in 1935-36 is estimated at 47,265,00 bushels. On 11th July, 1936, the quantity of wheat grain stored in silos and on railway premises was 7,412,000 bushels. Of this quantity 3,049,000 bushels were on sites in the Metropolitan area.

December	11.76	5.70	11.81	6.16	12.69	6.44	13.98		

\* See note below.

Numerous commodities were exempted from tax as from 1st September, 1932, 26th October, 1933, 1st August, 1934 and 25th October, 1935. Consequently, many traders dealing exclusively in exempt goods ceased to supply returns and the proportion of wholesale trade covered by the records has been progressively reduced. The figures for the five periods delineated above cannot be compared without allowance for this fact.

## 10. RETAIL TRADE.

\* State Government banking transactions suspended. Index not ascertainable.  
Government transactions.

† Exclusive of certain abnormal

The index may be regarded as an approximate measure of changes in the volume of business transactions settled by cheques provided it is considered in conjunction with changes in price levels. It represents the ratio of each month's clearings to the average for the month concerned during the five years 1926-1930. This average is represented by 100 each month. Seasonal fluctuations have thus been eliminated. Casual fluctuations in monthly index numbers have been smoothed out by taking a three months' moving average, that is, the index shown above for each month is the average of the actual index of that month and the preceding two months. It may be compared vertically or horizontally.

The index is adjusted to eliminate the effects of Treasury Bill and other special transactions on behalf of Governments and the effects of bank amalgamations. No adjustment has been made for normal growth or change of price levels. The amounts of clearings shown are the recorded totals less Treasury Bill transactions only.

\* Including new mortgages and renewals as registered.

† Totals for months are approximate and aggregate differs slightly from annual total.

The average monthly transactions for period 1925-1929 were:—Sales, £4,619,000; and Mortgages, £4,042,000.

NOTE.—Mortgages and liens in some instances secure fluctuating advances, the amount of which is not recorded in the legal instruments. The amounts shown relate substantially to mortgages of fixed amounts for fixed periods, and exclude fluctuating advances (such as overdrafts) secured by mortgage. Mortgages providing collateral security of subsisting mortgages are included.

In the six months ended 30th June, 1936, mortgages, exclusive of those providing collateral security, amounted to £8,608,000 as compared with £7,275,000 and £6,718,000 in the corresponding periods of 1935 and 1934 respectively.

## SECTION E.—GENERAL.

## 22. INDEX OF EMPLOYMENT—N.S.W.

After comprehensive analysis of Census data, the returns of private employers accompanying remittances of wages tax, and returns of Government employment, the following indexes have been compiled covering total employment and unemployment in New South Wales :—

Middle of Month.				Proportion of all who are dependent on and available for employment—			
				(a) Including full-time equivalent of part-time relief workers.		(b) Excluding full-time equivalent of part-time relief workers.	
				Employed. per cent.	Unemployed. per cent.	Employed. per cent.	Unemployed. per cent.
Census of 30th June, 1933	...	...	...	74·4	25·6	73·5	26·5
1934—May	...	...	...	80·5	19·5	77·9	22·1
June	...	...	...	80·8	19·2	78·0	22·0
1935—May	...	...	...	86·0	14·0	83·2	16·8
June	...	...	...	86·6	13·4	83·7	16·3
1936—May	...	...	...	90·8	9·2	88·6	11·4
June	...	...	...	90·4	9·6	88·2	11·8

The indexes have been adjusted to allow for an estimated increase of 1·2 per cent. per annum in the number of persons dependent on employment, but no adjustment is made for seasonal variation. At the Census, 15,142 persons dependent on employment returned themselves as unemployed by reason of illness, accident, etc., or "voluntarily." This number, representing 1·8 per cent. of all persons dependent on employment, is excluded from the above indexes, which relate to percentages of available wage earners employed and unemployed.

The approximate number of persons in private employment was 478,000 in June, 1933, 519,000 in June, 1934, 567,000 in June, 1935, and 614,000 in June, 1936.

**Employment in Factories:**—The numbers of employees in 98 of the larger factories of the State (including the 42 shown in Table 6) were as follow :—

## 23. STOCK EXCHANGE INDEX (SYDNEY).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and the group averages are the means of the average monthly prices per £ of paid-up capital. The aggregate index is the average for the whole of the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio of the average prices of ordinary shares to their par values; adjustment being made where capital is written off or bonus shares issued.
